Gemini 4 Argon is now available for Google AI Ultra subscribers and via Gemini API paid tier. Learn more.

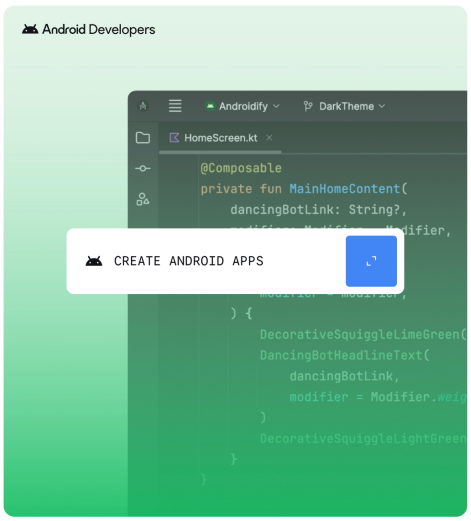

Build with Gemini

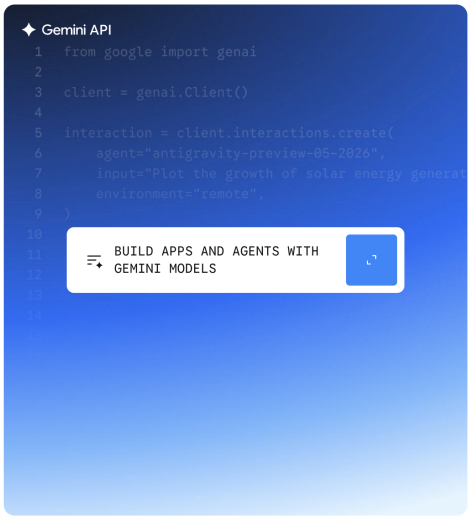

Unlock AI models to build innovative apps and transform development workflows with tools across platforms.

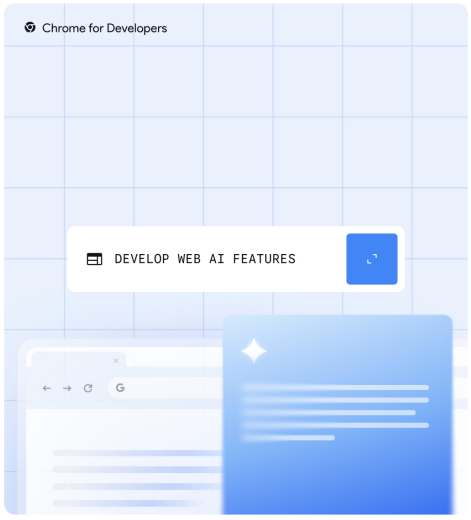

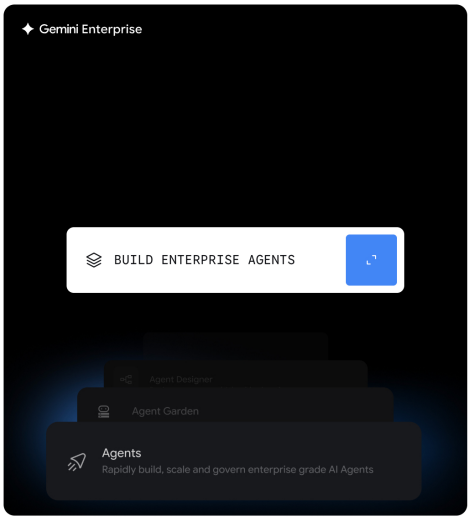

GEMINI API

Integrate Gemini directly into your apps

Unleash the full potential of your applications by integrating Gemini's long context window and native multimodal reasoning to process massive codebases, complex media, and real-time agentic workflows with a single API.

View documentation

PYTHON JAVASCRIPT GO JAVA REST

```python
from google import genai

client = genai.Client()

response = client.models.generate_content(
  model="gemini-3.5-flash",
  contents="Explain how AI works in a few words",
)

print(response.text)
```
